TERMS OF SUBSCRIPTION. Daily Herald, per month, soc; per year, \$7. Weekly Herald, per year, \$2. The Daily Herald is delivered by carriers in El Paso, East El Paso, Fort Bliss and Towne, Texas, and Ciudad Juarez, Mexico, at 60 cents a month. A subscriber desiring the address on his paper changed will please state in his communication both the old and the new address.

COMPLAINTS. Subscribers failing to get The Herald promptly should call at the office or telephone No. 115 before 6:20 p. B. All complaints will receive prompt atten-

CIRCULATION. The Herald bases all advertising contracts on guarantee of more than twice the circulation of any other El Paso, Arizona, New Mexico or New Mexico or west Texas pa-per. Daily average exceeding 10,000

The Association of American Advertisers has examined and certified to the circulation of this publication. The detail report of such examination is on file at the New York office of the Association. No other figures of circulation guaranteed.

HERALD TRAV-ELING AGENTS. Persons solicited to subscribe for The Herald should beware of imposters and should not pay money to anyone unless he can show that he is legally authorized by the El

Paso Herald.

The Last Obstacle Removed

HE last obstacle to the progress of work on the Rio Grande project has been removed. The court has affirmed the award to the owners of the land for reservoir site, dam site, and railroad rightofway. The money will be deposited at once by order of the secretary of the interior and the reclamation pervice has already been instructed to go ahead without a day's delay as soon as the formalities are complied with. It will take a month to advertise and open bids, but by the first of August active work should be in progress on the railroad and on the construction plant.

The word which was given to the people of El Paso in The Herald's extra at noon Tuesday is what we have been waiting for during these several years. The authority of all departments of the government is behind this project and positive instructions have already been issued to advance the work with all poseible dispatch.

Lands in this city and valley already possess a new value and a new stability by reason of the decision of the court at Socorro. The certainty that there will be an abundance of water for irrigation at all times in the valley within the next three or four years removes the possibility of fluctuating values. The lands in this valley are now ready for permanent settlers and homemakers who will be content to use the next few years in preparing their lands and planting such crops as will grow with the water now available,

It is not too early for permanent settlers and experienced farmers to go upon the land. Men who enter upon these lands now, however, should possess capital enough to carry them along for a few years even if there should be but partial crops occasionally. The big winnings will come to the men who put their money now into the land. Valley lands which can now be bought at from \$40 to \$75 per acre will be worth five or 10 times as much at the end of three to five years.

The people of this valley have not yet begun to realize the tremendous value of the asset they possess. There is not another big irrigation project of the government where land values have been kept down at as low a level as they have here. Any good farming land in the valley that is assured of water under the Rio Grande project when completed, is easily worth \$50 and upwards per acre today, and at that price the buyer will make even more through the increased value of his land as the project progresses toward completion, than he will make

Above all things, land from now on should be placed in cultivation. It will be possible to plant crops that will not be lost in the event of a partial failure of water before the dam is completed. The thing to do is to find out what crops can be successfully grown at this time and then proceed to improve the land.

Probably one of the best investments any land owner and homemaker could make at this time would be to plant orchard trees. They will not require as much water as other crops and by the time the dam is completed they will be old enough to bear abundantly. Land in bearing orchards five years hence under this project should be worth from \$1000 to \$3000 per acre according to location no trained water engineers to look. The people of El Paso are to be conand yield.

The last vestige of doubt or hesitation has been removed by the decision at Socorro and the development of this valley can now go forward on a broad scale with all the power and facilities at our command. It is certain that the returns will be larger than from any other form of investment that can be made.

Almost no black was used in the mourning draperies for king Edward's funeral; the prevailing colors were violet, green, and white. The time is coming when we shall cremate the dead instead of burying them, and then black will no longer be used as a sign of mourning.

Mexico city is making great preparations for the centennial celebration in September. Visitors will have a chance to see under the best circumstances one of the most beautiful cities in the world.

Double Cost, No Compensation

HE insurance companies may be able to explain why lumber yards are given almost as low a rate as a steel, concrete, and tile fireproof modern office structure, while well built, well kept brick buildings are given a rate from two to six times as high as the lumber yard. This serious apparent discrepancy will furnish good fodder for the insurance company representatives to chew on at Austin next week.

It is reported that insurance companies are already beginning to cancel policies written during the past 12 months at the old rates and to require new policies at the new rates. Almost any excuse suffices for cancelation-for example, a very slight change in the risk whether as to hazard, occupation, or use. Almost any kind of permit that the assured may wish to have attached to the policy will give an excuse for cancelation. It is believed that within a month or two there will be no policies outstanding written at the old rate, but that all will be carry: ing the new rates.

Under some constructions of the law, the total amount of difference between the old rates and the new for all policies covering the period since January 1 became payable today on pain of voiding the policy. There is a difference of opinion about this, and most of the agents have not sought to collect the increased rates, pending the settlement of the city's status.

Hereafter it will be necessary for every property owner and merchant to keep a very accurate record, a diary, of every happening that may affect in the slightest degree his insurance rate. It will be necessary for every business man to study up the exhaustive rate schedule and guard himself against any of the thousands of possible violations. The increase in rates is cause enough for general protest, but in addition to this, business men are beginning to realize that they are to be subjected to new burdens of annoyance that will also impose additional costs upon their business.

The committee of citizens appointed to prepare data for the hearing at Austin has sent out several thousand cards for the purpose of ascertaining the old rates paid. The local agents are cooperating in the work of gathering data, and El Paso's representatives will go to Austin with their case well in hand. The local representatives of the fire insurance actuaries will also go to Austin prepared to

present the side of the insurance companies. Under all the conditions now imposed, the adjustment of insurance losses will be a very difficult and complicated matter. Business men are hardly more at sea than insurance company representatives themselves. Nobody knows what's what, and the only certainty apparently is that immense sums will be sent out of El Paso from this time on for fire insurance in addition to what has heretofore been paid. What additional benefit we are to derive for the \$10,000 or \$20,000 per mouth extra premums has not yet been demonstrated.

UNCLE WALT'S Denatured Poem

HE CAME home with a string of fish; his wife soon had them fried; and, as he are the fragrant dish, he lied, my friends, he had them fried; and, as he were fine? very fine," his children heard him say; "but ah! I had a rotten line, and the biggest got away!" He goes down town among his friends, and wears their patience out; he talks and talks till night descends, about his string of trout. "My heart," he says, "will know re-FISH

gret until my dying day; alas! that fish so large and wet —the one that got away!" All people know the tale he springs is made of mist and smoke, and heated air and dragon wings, and prehistoric joke. But he will tell his weary tale "The mem'ry makes my spirit wail-the fish that got

rway!" And you, perhaps, have some old yarn, as tiresome, stale and vain, that Adam told behind the barn, his sons to entertain. Though it may seem to you quite fine, it grates on others' ears; O put it down, my friend, in brine, and let it

CRUELTY TO ANIMALS.

Editor El Paso Herald: In the effort now being made for the rotection of dumb animals, the Humane society is making every effort for right conditions at the pound and in the catching of the dogs. While the dogs are more comfortable as to space and water, the matter of additional shade, which has been promised, is yet to be regulated. The dog wagon and its executives, officially badged, now present a very different appearance from the past, when a dirty raft of little urchins followed in its wake, running madly after stray dogs, jerking, choking, abusing the creatures so that bystanders must interfere—no sight for an advanced city like El Paso. It was demoralizing to childhood,

degrading to the public highway and entirely out of order. Against the petty stealing of the tags, a constant occurrence, in justice to citizens who lawfully license their dogs, it is their right to have these dog catchers chosen and placed with regard to their recommended honesty and professional execution. The pound is an official institution and represents

citizens' cause, therefore is under the protection of the law. Many horses in bondage to cruel mas ters have been relieved; some worse off living than dead, mercifully destroyed. What citizen who would not be glad to have his or her name associated with a cause struggling to relieve the helpers against abuse and oppression? We need many more members to perpetuate this redemptive work. El Paso has outgrown the mule car: mossback means must go down for higher structures.
